Title: Basics of Algebra & Calculus

Algebra

- Linear Equation: $ax + b = 0$
- Quadratic Equation: $ax^2 + bx + c = 0$
- Formula: $x = (-b \pm \sqrt{(b^2 - 4ac)}) / 2a$

Key Concepts

- Functions: Relation between input and output
- Domain & Range
- Graph representation

Calculus

- Derivative: Rate of change
  - $d/dx\ (x^2) = 2x$
  - $d/dx\ (\sin x) = \cos x$
- Integration: Reverse of derivative
  - $\int x\, dx = x^2/2$

Tips

- Practice basic problems daily
- Focus on formulas
