Title: Introduction to Machine Learning

Types of ML

1. Supervised Learning
    - Uses labeled data
    - Example: Linear Regression
2. Unsupervised Learning
    - No labels
    - Example: Clustering

Important Algorithms

- Linear Regression
- Logistic Regression
- Decision Trees

Workflow

1. Collect Data
2. Clean Data
3. Train Model
4. Evaluate

Key Terms

- Overfitting
- Underfitting
- Accuracy
